INFORMATION SHEET

OIE virtual workshop:

Preparing for and dealing with incursion of an infectious disease – rabies

Monday 22nd & Tuesday 23rd March

12-3pm JST (Meeting time calculator <https://bit.ly/2NyxFUm>)

Background

Rabies is one of the deadliest zoonoses, killing nearly 59,000 people worldwide each year. Over 95% of human cases of rabies are due to dog bites and we have the tools needed to eradicate it. Although rabies is endemic throughout much of Asia, many countries—particularly in the Pacific region—remain free from the disease. However, these countries are still at risk of disease incursion and vigilance is key to remaining free from rabies. A risk assessment study conducted by the OIE in 2019 showed large scale movement of dogs by land and sea across South East Asia – these pose a threat to many areas in the region, including island countries. To this end, many countries have various legislations such as biosecurity or sanitary protection laws which include contingency policies to tackle a potential incursion.

We will hold a series of virtual meetings for the Asia and Pacific region to share updates, progresses and tools from the OIE and partners, and also experiences from countries. Meetings are being organised for endemic countries in ASEAN and SAARC – the focus of these is on rabies control and elimination. However, for non-endemic countries or those with the disease only in a specific infected zone, it is more appropriate to focus on prevention measures, risk communication skills, and contingency plans should an incursion of rabies occur. Many of the principles of biosecurity and contingency planning are applicable to other zoonoses and skills from this workshop can be applied to other diseases.

Preparation

A short online survey has been shared with the OIE Delegate and Focal Point for Animal Disease Notification. This should be submitted to the OIE by either of these contact persons in advance of the training, by Monday 15th March, to be included in the summary presentation on Day 1.

Provisional agenda

Day 1, Monday 22nd March: Rabies preparedness in the region (3 hours)

Presentation	Speaker	Time
Opening of workshop & participants' photo	OIE RRAP	5 min
Welcome remarks	OIE Regional Representative	5 min
Outline of the virtual workshop	OIE RRAP	5 min
What is "Zero by 30"?	TBC	20 min
Risk assessment on cross-border spread of dog-mediated rabies in South-East Asia	Professor Michael Ward, University of Sydney and Dr Victoria Brookes, Charles Sturt University, Australia	30 min

Preparedness across the region – summary of Members' survey	OIE RRAP	15 min
<i>Comfort break</i>		10 min
Keeping rabies out – examples of plans in the region	Members	45 min
Discussion/Q&A	Chair: OIE RRAP	45 min

Day 2, Tuesday 23rd March: Contingency planning and risk communication for rabies (3 hours)

Presentation	Speaker	Time
Welcome and brief recap from workshop day 1	OIE RRAP	5 min
Contingency plans – effectively eliminating an outbreak and preventing further spread	Dr Changchun Tu, CVRI, China (OIE expert)	20 min
Rabies incursion into a free region – a multi-sectoral problem	TBC	15 min
Public awareness and community communication	Dr Robyn Alders, Australia	30 min
Dealing with the media during a rabies incursion	TBC	15 min
<i>Comfort break</i>		10 min
Regional examples of awareness campaigns	Members	40 min
Discussion/Q&A	Chair: OIE RRAP	45 min

Participants

This event targets OIE Members in Asia and the Pacific where rabies is non-endemic (including those where certain areas are disease-free). These sessions on 22nd and 23rd March are open to any appropriate participants from Members. They are also open to participants from other countries as observers. Therefore, do not hesitate to share the event details with colleagues and partners working in government, academia, research institutes, NGOs, and private sector working on rabies in your own country or neighbouring countries.

The training is anticipated to be relevant to representatives from these groups:

- Focal point or person taking the lead in rabies control and elimination activities in Member countries from both animal and human health sectors
- Representatives from the One Health secretariat/committee/task force (or equivalent, as appropriate)
- OIE National Focal Points for Animal Disease Notification
- OIE National Focal Points for Communication
- One or two other representatives from biosecurity/quarantine departments (or equivalent, as appropriate)
- Representatives from the tripartite and partners: FAO RAP, OIE RRAP and SRR-SEA, WHO SEARO and WHO-WPRO, GARC

Course methodology

The training will be undertaken using PPT presentations, pre-recorded videos, live Q&A and facilitated discussions.

Virtual platform

The event will be held using the **Zoom** platform. Please ensure to install Zoom on your computer or smart phone to access the webinar. Download and create a Zoom account at <https://zoom.us/download> if you do not already have one.

Registration

Participants are required to register for the webinar using the following QR code or link: <https://bit.ly/3qT4hXs>

Once you register for the meeting, you will receive an email giving access to join the zoom meeting. Please save the e-mail carefully as you will need to join using the private link provided in the email.

**Joining the webinar**

Click on the link in your registration email to join the meeting on 22nd and 23rd March 2021. Please join a few minutes before the scheduled starting time.

Other information

The webinar materials including presentations will be uploaded on the OIE Asia Pacific website at <https://rr-asia.oie.int/en/> after the event.

Event evaluation

At the end of the training, all participants will be asked to complete a short evaluation survey (online) to assess the usefulness and impact of the training, to identify important topics for future events, and suggestions to enhance rabies prevention and control in the region. The link to the event evaluation will be shared later.

For further information about this training, please contact the OIE Regional Representation for Asia and the Pacific: Dr Lesa Thompson (l.thompson@oie.int) with copy to asia.pacific@oie.int
